## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2, "a household electrical appliance, particularly a refrigerator" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention or are environmental limitations. Since the claim later recites the device "associated with the cabinet and with the door", all claims will be treated as claiming a hinge-refrigerator combination.

In claim 4, lines 2-3, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

In claim 13, it is not clear structurally what "directly or indirectly cooperating" is meant.

### ***Drawings***

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hinge claimed in

Art Unit: 3676

claims 11-13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3676

5. Claims 1-9, and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mills (2,778,000).

Mills has connectors (31, 36, 64, 68 and wires (inherent feature) connecting the power source to the bolts and connecting the power from the bolts to the user device), a reinforcement element (75, 79, 62, 70), and each conductive element is insulated from the cabinet and door (32, 39, 61).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 10, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mills '000 in view of Pulaski (3,089,202).

'000 discloses the invention as claimed but for the conductors embedded in the insulating material of the refrigerator. '202 teaches embedding the conductors in the insulating material to absorb the twisting action. It would have been obvious to one of ordinary skill in the art at the time the invention was made to embed the conductors of '000 in the insulating material as taught by '202 to absorb the twisting action resulting from opening/closing of the door.

As to claims 11 and 12, it would have been an obvious matter of design choice to choose other type of hinges for the refrigerator of '000 or whatever form or shape

was desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47.

**Conclusion**
